Residential

16th St. Residence, New York, New York

Design By: Studio 22 Architecture, P.C.

Design Vision:

Lifestyle is of priority in designing a residence. Residential design in general requires understanding a resident's tastes and preferences to derive a direction for an intended atmosphere. The vision for the 16th Street Residence is to depict the client's lifestyle with elegant design elements that gracefully support it.

The overall design concept strives to preserve an open feel to the apartment. The apartment design palette embraces the idea of unisex with the subtle meaning of "female" understood. Quiet, strong, simple elegance depict the design goal. The materials and finishes claim sophistication and serenity.
